Marlene H. Dortch, Secretary
Federal Communications Commission
Office of the Secretary
445 12th Street SW
Washington, DC 20554

RE: Docket No. 07-16

Dear Secretary Dortch:

I recently learned that your commission is reviewing a petition by M2Z Networks to provide free, wireless Internet. This wonderful idea could spark a small business revolution in America - which is exactly what we need to thrive in the new global economy!

Upon further research, I found that only 35% of Small and independent businesses have company websites and only 59% use the Internet for business related activities. Aside from addressing that terrible technology deficit, this proposal seems to have plenty of other wonderful benefits including:

- Helping small and independent businesses take advantage of online marketing opportunities;
- Keeping America's economy strong and competitive, especially with countries where affordable broadband is already widely available; and
- Allowing small and independent business to participate more fully in e-commerce.

Under M2Z's plan, a nationwide wireless broadband data network would be available without cost to all American families and small business entrepreneurs. I can personally attest to benefits of such a proposal, as a business owner that regularly delivers services in Wayne County and works closely with county and city government.

I hope you will join me in endorsing this plan to help Michigan businesses and American entrepreneurs across the country.

Sincerely,

Thomas Duncan, President
